DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 7 and 9 have been considered but are moot in view of the new ground(s) of rejection.

Priority and Oath/Declaration

1. This application is not a United States National Stage Application of International Application No. PCT/AU02/01306 because there is no Notice of Acceptance of Application under 35 U.S.C 371 and 37 CFR 1.495 of record. Accordingly, this application is a regular application.
2. Applicant has claimed domestic priority under 35 U.S.C. 120 of International Application No. PCT/AU02/01306 in the declaration filed December 12, 2004.
3. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: on pg. 1, the declaration indicates this application is a national stage of PCT. This application is not a national stage of a PCT as explained above.

4. This application discloses and claims only subject matter disclosed in prior Application No. PCT/AU02/01306, filed September 20, 2002, and names an inventor or inventors named in the prior application. Accordingly, this application may constitute a

continuation or division. Should applicant desire to obtain the benefit of the filing date of the prior application, attention is directed to 35 U.S.C. 120 and 37 CFR 1.78.

5. If applicant desires to claim the benefit of a prior-filed application under 35 U.S.C. 120, a specific reference to the prior-filed application in compliance with 37 CFR 1.78(a) must be included in the first sentence(s) of the specification following the title or in an application data sheet. For benefit claims under 35 U.S.C. 120, 121 or 365(c), the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of the applications.

If the instant application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A benefit claim filed after the required time period may be accepted if it is accompanied by a grantable

petition to accept an unintentionally delayed benefit claim under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

If the reference to the prior application was previously submitted within the time period set forth in 37 CFR 1.78(a), but not in the first sentence(s) of the specification or an application data sheet (ADS) as required by 37 CFR 1.78(a) (e.g., if the reference was submitted in an oath or declaration or the application transmittal letter), and the information concerning the benefit claim was recognized by the Office as shown by its inclusion on the first filing receipt, the petition under 37 CFR 1.78(a) and the surcharge under 37 CFR 1.17(t) are not required. Applicant is still required to submit the reference in compliance with 37 CFR 1.78(a) by filing an amendment to the first sentence(s) of the specification or an ADS. See MPEP § 201.11.

6. Furthermore, if applicant desires to claim the benefit of International Application No. PCT/AU02/01306 under 35 U.S.C 120, applicant must submit a new declaration indicating on pg. 1 the proper relationship of this application to the PCT (i.e. continuation, divisional, or continuation-in-part). The proper relationship must also

appear on the pg. 3 of the declaration in the paragraph claiming the benefit under 35 U.S.C. 120.

7. If applicant desires to claim benefit of foreign priority of Australian application No. PR7771, applicant must claim priority under 35 U.S.C. 119 on a separate sheet of paper or within the declaration, and submit a certified copy of the application.

Specification

The abstract of the disclosure is objected to because the page it is on contains superfluous drawings, data, etc. An abstract on a separate sheet is required. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 7 and 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Soper et al., AU Application Patent Publication No. PR777101D, published October 11, 2001. The disclosure of this publication is considered be the same as the disclosure of applicants' Australian application No. PR7771, accordingly no detailed rejection is provided.
